SUMMARY

Full-stack developer with experience in MERN stack, Next.js, FastAPI and cloud technologies, delivering scalable and high-performance solutions

EXPERIENCE

Full Stack Developer (Web3 and AI) *May 2025 - Present, Madurai, TN*

WeAlwin Technologies

- **DeFi & DEX Development:** Built and deployed decentralized exchanges and DeFi protocols for secure peer-to-peer asset trading (eQuity DeFi, HODL).
- **Blockchain Integration:** Connected smart contracts to full-stack apps with real-time on-chain event listeners, and built a multi-RPC failover system that avoided rate limits and cut client costs by 30%.
- **Crypto Gaming:** Developed features for blockchain-based games, including real-time interactions and secure on-chain asset management (Wincho, Kickwin).
- **Full-Stack Development:** Built scalable, responsive web applications end to end using the MERN stack (MongoDB, Express, React, Node.js).
- **AI Automation & Scraping:** Created an AI content pipeline for Bitcoin World (RSS ingestion, editorial and SEO agents, auto-publishing) and an HKJC data scraper powering a real-time horse-racing betting platform with automated rewards (Racing 8888).

Software Developer *May 2024 - May 2025, Hyderabad*

Sunyatee International Foundation

- **Full-Stack Development:** Built and maintained full-stack apps with Node.js, Express.js, and React.js for Parchi (business management) and Rise Platform (mindful sounds), improving web performance by 30% and user satisfaction by 20%.
- **Firebase Integration:** Integrated Firebase (Firestore, Storage, Authentication) into Parchi and Rise Platform, cutting data retrieval time by 40% and strengthening user data security.
- **REST API Development:** Designed RESTful APIs for Rise Platform and Ausum Kids, improving response time by 25% and working with front-end teams to enhance UX for 5,000+ users.
- **Platform Leadership:** Led development of Rise (meditation and Sunya talks) and Ausum Kids (therapy booking), improving load times by 20% and user engagement by 30% across users, providers, and admins.
- **DevOps & Deployment:** Deployed applications on AWS with Nginx and Jenkins, automating CI/CD pipelines and maintaining 99.9% uptime for Parchi, Rise, and Ausum Kids.

WordPress Admin (Sales specialist) *August 2022 - July 2023, Bangalore*

Corizo

- Managed and maintained the Corizo WordPress website serving 1,000+ online learners, handling content updates and keeping the site running smoothly.
- Mentored 100+ students through online programs, providing technical support and career guidance, and improving course completion rates by 90%.
- Converted 200+ leads into enrolled students through consultative selling and structured follow-ups, generating ₹1.3L in enrollment revenue.

INTERNSHIP

Full Stack Developer Trainee *August 2023 - April 2024, Bangalore*

Sharpener

- **Career Transition & Full-Stack Development:** Moved from sales into tech and built full-stack applications with the MERN stack (MongoDB, Express.js, React.js, Node.js), improving system efficiency and scalability in a fast-paced environment.
- **API Optimization:** Improved API performance by 30% using Node.js and Express.js, streamlining data flow between front end and back end.
- **Firebase Integration:** Implemented secure authentication and real-time database updates with Firebase (Firestore, Storage, Authentication), improving data security and reducing latency.

PROJECTS

Founder & Lead Developer | Otaku Match *April 2026 - Present*

otaku-frontend-2026.vercel.app/

- **Product Vision:** Spearheaded the development of an AI-powered matchmaking platform for a niche community of gamers and anime enthusiasts, scaling from concept to a functional beta with the capability to handle 10,000 users.
- **Technical Stack:** Architected a high-performance stack using Next.js, Node.js, and MongoDB, ensuring seamless server-side rendering and rapid data retrieval with razorpay integration.
- **Database Design:** Engineered complex MongoDB schemas to categorize 500+ titles across FPS, RPG, and MOBA genres, enabling precise, AI-driven user compatibility scoring.

Founder & Lead Developer | StudySenpai *September 2026 - Present*

senpai-study.vercel.app

- **Platform Launch:** Built and launched a clan-based live coding cohort platform for Full-Stack, Web3, and Gen AI engineering, live in production.
- **Training Impact:** Trained 100+ students in web development through hands-on live cohorts, with a zero-upfront-fee enrollment model.
- **Technical Stack:** Developed the platform with React.js, Node.js, and Tailwind CSS, with Web3 and Solidity smart contracts for blockchain-verified credentials.
- **Curriculum:** Covered Gen AI and RAG in the curriculum, preparing students for full-stack and AI engineering roles.

SEO-Optimized Landing Page for Arthaveda Learning and Development *May 2026 - May 2026*

www.arthavedalearning.com

- Designed and Programmed a high-performance SPA landing page for Arthaveda, improving SEO ranking, user engagement, and brand visibility.
- Optimized page speed and responsiveness using Next.js and React.js, reducing load time by 30% and enhancing cross-browser compatibility.
- Strengthened best SEO practices, including structured metadata, dynamic rendering, and mobile-first design, driving higher organic traffic.
- Ensured seamless deployment with AWS and Vercel, automating CI/CD pipelines for faster updates and 99.9% uptime.

EDUCATION

Bachelor Of Technology in Biotechnology

Minor in Gene Coding | *Lovely Professional University* | *Punjab* | *2022*

SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, HTML5, C++, Solidity, Python

Frontend Development: ReactJs, NextJs, Redux Toolkit, Tailwind CSS, Bootstrap, Material UI

Backend Development: NodeJs, ExpressJs, RESTful APIs, Authentication (JWT), Fastify, FastApi

Mobile & Low-Code Development: FlutterFlow, Firebase (Realtime Database, Firestore, Authentication)

Databases & Cloud: MongoDB, MySQL, PostgreSQL, Firestore, Mongoose, AWS EC2, Google Cloud Platform

AI & Machine Learning: Retrieval-Augmented Generation (RAG), LangChain, Langgraph, Vector Databases (Pinecone), OpenRouter, Ollama, AI Automation (OpenClaw), Multi-Agent AI Systems

DevOps & Tools: Docker, Jenkins, Nginx, Git, GitHub, CI/CD, Linux/Unix Systems, Sequelize, Drizzle, SQLAlchemy

Web & Blockchain Technologies: WordPress, Blockchain Development, Dex, Dapps, Wallet Integration, Smart Contracts (Solidity), MetaMask Integration, Web3.js, WebSockets, Web Scraping, SEO

CERTIFICATIONS

Certification: Blockchain Basics | Cyfrin Updraft | 2025

- Certified in Uniswap v4 Development, specializing in custom Hook logic, Singleton architecture, and gas-optimized smart contract integration.

JavaScript Algorithms & Data Structures | freeCodeCamp | 2023

Problem Solving (Intermediate) | HackerRank | 2023

Version Control with Git | Coursera | 2022

AWARDS & LANGUAGES

Award: Best Employee of the Month

Languages: English, Hindi, Tamil
